## REPORT OF THE BOARD OF EDUCATION.

In submitting the second annual report under the new system, it is perhaps unnecessary to remind you of the extra amount of labor required to make the changes suggested in the report of last year, and that still further changes are needed, in order to more fully obtain the benefits contemplated under the law. The board refers with a certain gratification and pride to some of the improvements made during the past year. The two new school houses that have been built, considering the limited appropriations, are as roomy and efficient structures as could be expected. Especially is this true of the modern, commodious house that has been built to take the place of the dilapidated and unsightly structures in the old Districts Nos. 10 and 18 (Collins and College), which, with its spacious and finely graded lawn or play-ground, nestled in among natural and majestic shade trees, makes so great a contrast that the most disinterested passer-by cannot fail to observe and forcibly comment on its general appearance. Under this new arrangement one of the best schools in town has been organized; for thoroughness and brilliancy it cannot be surpassed. The union of the old Joppa and Kimball districts is scarcely less beneficial to the interests of that portion of the town district; and the new school house therein erected is pleasantly located and well adapted for its purpose. When the new patent desks and seats, already ordered, are put up in these buildings, the Board will consider that the money has been judiciously expended and a good thing done.

It is a pleasure for the Board to report that nearly all the schools the past year have been "model schools;" only a few, under present existing influences or evils over which

the law provides no remedy, have proved in a less degree satisfactory. One of the chief evils referred to is the disposition of parents to express their dislikes and prejudices, before the teacher has entered upon her duty, and to keep it up during the term of school. Another is the method of outside parties who never visit a school or have a desire to, to maintain a continual fault-finding with everything connected with the school, and to circulate all unfavorable gossip without investigation. The influence of such a course is calculated to injure the best school in the world, and it sometimes takes months to recover from the demoralizing effects. No one has a right to find fault with a teacher or the management of a school, without first making an impartial investigation; it will then be time enough, if the evils exist, to take proper measures to eradicate them.

The town system now in vogue is, in our opinion, gaining in favor and popularity among the true friends of education. They certainly cannot fail to see its advantages over the old way. The money is more evenly apportioned throughout the town, and the children in the outlying portions, in most cases receive as much as, or more schooling than those in the village and central portions. The average length of school during the year for the several districts, has been 22.3 weeks, but several of the districts, as will be seen by the tabular statement, received 27 or 28 weeks, almost double the amount of schooling they would have had under the former system. It also serves to secure much better schools, for the reason that the Board seek in their selection, to adapt the teacher to the school, oftentimes placing the better teachers in the poorer schools and *vice versa*. This will continue to be done as long as the Board are conscious of any advantage gained by such a course.

No new text-books have been introduced during the year; but at its last sitting the Board voted to adopt the "New Inductive Course" of Greenleaf's series of arith-

metic, which will be introduced into all the schools the coming year. The series embrace "First Lessons in Numbers," which will take the place of old Primary; "A Brief Course in Arithmetic," to succeed the old Mental or Intellectual, and the "Complete Arithmetic," to succeed the Practical. The "Complete" is already used in the High School as a text-book, and the adoption of the series insures a uniformity throughout the town.

The Board wishes to call your attention to the fact that by the new apportionment the school money will be much less the ensuing year than formerly, which means less schooling and lower wages for teachers, unless a larger sum is raised than is compulsory by law. Most of the school houses are in need of extensive repairs, such as painting and whitewashing, and an outlay now will save a much larger outlay by and by. We would humbly petition that a larger sum be raised for schools than is required by law; or that an appropriation be voted sufficient to enable us to keep the school houses in repair, so that no money need be taken for that purpose out of the regular school funds.

We also wish to state that the school house in that part of the town district known as Tory Hill, is not fit for the purpose for which it is used, and that in our opinion, a new building should be erected for the accommodation of that part of the school district. We sincerely trust in your good judgement for the sanction of such a scheme.

Respectfully submitted,

## REPORT OF THE SUPERINTENDENT.

As another year rolls round and we are again required, by the general laws, to report the condition of the Simond's Free High School, the occasion does not seem to call for more than a brief statement announcing its continued prosperity.

The fact that Henry S. Roberts, now in the fourth year of his service, is still in charge, alone must afford a gratifying assurance to such as give heed to the current history of the school, that all is well with it.

Miss Mary P. Frisbee of Portsmouth, is still assistant. She is alert, accomplished, efficient and a valuable coadjutor to the Principal.

The winter term did not begin until one week later than the usual time, in consequence of the illness of Mr. Roberts; and his continued indisposition made it necessary for Miss Frisbee to assume the entire management for one week, until Mr. E. B. Hale of Concord, a graduate of Dartmouth College, was employed, who also taught one week; and thus there was no break.

The school is small and there are signs that it is not appreciated in some quarters: nevertheless, it is doing its great work, shedding its light through the valleys and over the hills of the whole town; those who do not seek its benefits in the school-room, get them indirectly, and involuntarily perhaps, from those who do; thus silently and constantly its inlightening influences are ever at work.

It is ever to be hoped that our people will at all times

realize and strive to *appreciate*, that the High School of Warner does for the poor man's boys and girls what the rich man's money, in the past, has done for his, and makes it possible for them to achieve an education. Really, the legislation that has made such a condition of things possible is God-like. The general results of the year have strengthened our confidence in the wisdom of the rule adopted by us, and now well known, of having the pupils well prepared before entering the High School.

This rule, has, doubtless, caused a small attendance for the present year—though we have had twenty-five pupils from other towns—but has increased our hopes for future patronage and high standing of the school.

Excellent results have been obtained from the introduction into the course of the studies, music and drawing.

The methods of instruction are modern and such as to develop the critical talent of the individual scholar.

SAMUEL DAVIS, Superintendent.
